

ShotcreteandMortarEquipment

Durable, Mobile, Powerful

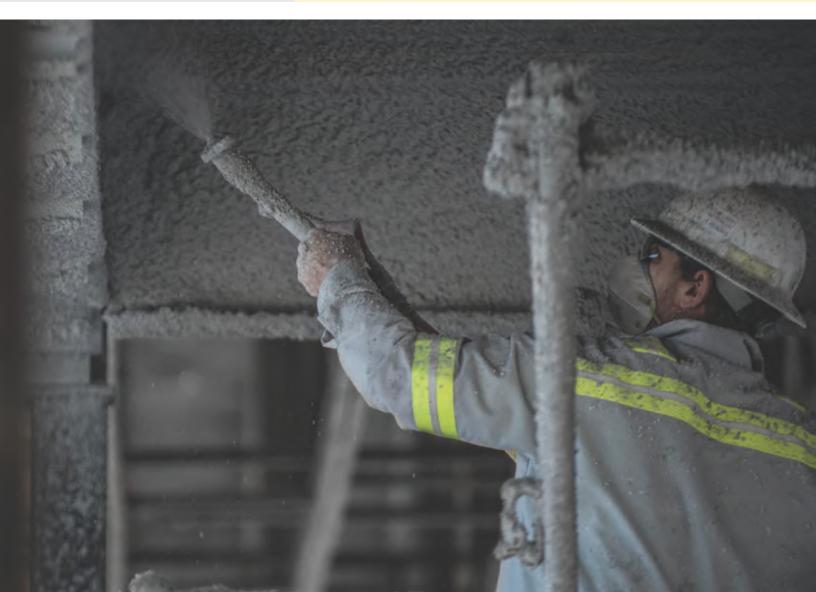

Solutions for the surface industry

A properly prepared surface requires the expertiseofaprofessionalincombinationwith highquality, high performance tools. Known and respected in the wet-and dry-process shotcrete industry formore than a century, Putzmeister Shotcrete Technology also provides equipment for the mortar industry.

Whether your surface needs encompass large or small construction sites, coarse orfine materials, or long or short delivery distances, PutzmeisterShotcreteTechnology has the machine for the job. With several versionsofeachmodelavailableatarange ofperformancelevels, Putzmeister's mortar productlineoffersjob-provenproductivity, reliability and ease-of-use. Our professionals can work with you to choose the right machine for your application, including:

- Fireproofing
- Stucco
- Pipe and Manhole Relining
- EFIS
- Injection Work
- Pressure Grouting
- Concrete Repairs

- Plaster
- Cementitious Adhesive
- Reinforcement Mortar
- Pool Plastering
- Self-Leveling
 Underlayment (SLU)

S5 Series — Rotar/Stator Pumps and Mixers

AdvancedTechnology,BetterFeatures,HigherProductivity,Efficient,Trouble-FreePerformance

Productive and long-lasting, our S5 series pumps and mixers are compact yet powerful, and cantackle avariety of materials with ease. Offering an array of capabilities, both the S5 gas and electric worm pumps have variable control. And can pump drymix or wet mort arfrom bag or silo. The elite performance of our S5 electric versions is the result of our specially engineered variable frequency drive (VFD) technology. Count on these highly versatile Putzmeister units to help you perform at a higher level.

S5 EV | Electric Version

Thenumberonechoiceofasbestosabatementresprayapplicators in North America, our electric S5 offers even more features — special Variable Frequency Drive (VFD) technology for infinite control from zero to fullout put, variable speed motor with geard rive, variable speed remote control, reversing feature and more.

S5 Series — Rotar/Stator Pumps and Mixers

S5 GH | Gas Version

Primarilyforoutsideplasterandstucco, this 20 hp(15 kW) gas version is also popular for pressure grout, vermiculite, swimming pool finish and pipeline refurbishment. This hydraulic drive offers the ease offully variable output from zero to full volume and are verse pump feature to relieve line pressure.

TM 100 Mixer

Ideal for plaster, stucco, grouts and fireproofing materials, this highly versatilemixerfeaturesapaddletype mixingbladewithrubberwipersand reversingfeatureforefficientmixing. Plus, it easily bolts on to the S5 EV for quick, convenient use.

MP 25 — Plaster and Mortar pump

MP 25^{MIXIT} | Dry Process

MP 25^{MIXIT} — High-performance,Low-cost

MP25hasbeenwell-knownformanyyears foritsunrestrictedrangeofapplicationsand the easy disassembly of the machine.

Being a typical Putzmeister mixer pump, youcancompletelydisassembletheMP25 witheffortlessease.Themodulargroupscan thenbeeasilyloaded into a caror carried up to the upperstory on the construction site. There the hoses are connected and work can begin!

With a conveying performance of up to 25 l/min (40 l/min Export version), the MP 25 offers enough performance for your requirements on the construction site. The well-proven low-wearing "Power Pump" also contributes considerably toward this.

The MP25 outperforms other machines in the industry because it does not create a largedust cloud. It can be drained to almost 100% without any danger of dust and segregation. The result is a better mortar quality and less dust.

- Compact design
- Perfect for smaller jobs or as a spare machine
- Idealforgroundcoatplaster,adhesiveand reinforcementmortar,refractorymortars, and texturing plasters
- Maximum output of up to 11 gal/min (40 lpm)
- Easy to assemble onsite without tools — by one person
- Handlesallpumpabledrymixedmortars

SP 11^{LMR} Plastering pump

SP 11^{LMR} | Wet Process

The specialist machine for all premixed dry mortar and site-made mixes

The Putzmeister SP 11^{LMR} wormpumphas beenspecially designed to meet the needs for plastering, filling and grouting work. The exceptional capacities of the mixer and hopper provide the necessary resources for awide variety of tasks, while the machine's low towbar load means it can be easily and comfortably maneuvered. The SP 11^{LMR} offers lasting value – thanks to its light weight engine hood which can with stand even the toughest conditions on site – thus making it very economical.

These are all excellent reasons for choosing a Putzmeister plastering machine, especially if you use site-made mixes or prebagged interior and external plasters, monocoat, fireproofing mortar, base coat plaster, lightweight mason rymortar, or namental mortar as well as filling and grouting work.

- Compact design
- Ideal for site mixes or bagged interior and exterior mixes
- Maximum outputs up to 2.12 ft³/min (60 lpm)
- Easy to use standard swivel mixer
- Suitable for both low slump and free-flowing mixes
- Sound isolation for quieter operation
- Conveniently operated through the control panel

SP 11^{LMR} SPECIFICATIONS

| Performance | |
|--------------------------------|---|
| Version | Ligting mixer |
| Pump Type | 2L6 |
| Delivery Pressure | 363 psi (25 bar) |
| Theoretical Delivery Rate* | 1.3–16 gal/min (5-60 lpm) |
| Horizontal Delivery Distance** | 197' 60m |
| Vertical Delivery Distance** | 131' 40m |
| Compressor | 2-cylindercompressor160gal/m(400l/min),101psi(7bar) |
| Lifting Mixer | 48 gal (180 l) |
| Conveyor Hopper | 58 gal (220 l) |
| Engine | 3-cylinder Kubota, 22hp (16.3 kW) at 2,600 rpm |
| Chassis | unbraked, suitable for road use |
| Filling Height | 31.5" (800mm) |
| Maximum Particle Size | 0.2" (6mm) |
| Dimensions | |
| Length | 128" (3,260mm) |
| Width | 56" (1,420mm) |
| Height | 46" (1,160 mm) |
| Weight (approx) | 1,654 lbs (750kg) |

^{*} The delivery rate is theoretical and depends on the pump pressure.

The data is based on experience and is dependent on the materials used.

Piccola — gunning machine

Piccola | Dry Process

ThePutzmeisterPiccolaisbuilttothe Swiss design with a vane air motor (250–600cfm),flathopperwithbag breakerandscreen,and 1½"(38mm) outlet diameter as standard. It is a recommendedmachinefordry-process shotcrete in Refractory and Civil applications.Versatileandrobust,this machinerequireslittlemaintenance and is easy to operate.

- Versatile, robust, easy to operate
- Requires minimal maintenance
- Outputupto6yd³/hr(4.6m³/hr)
- Standard 1.5 in (38mm) outlet diameter is used widely in refractory applications

Options include

- Variable speed electric motor, diesel engine, or no power (rig mounted)
- Rotoroptionsincluding12roundhalf, 12 round-full, 9 round-full, pie-half, and pie-full
- Slanted hopper with screen
- Forkliftskidorfoam-filledrubber tire mounting
- Dust suppression system

| PICCOLA SPECIFICATIONS | |

Magnum — combination mixer pump

Magnum | Wet Process

The Powercreter[®] Magnum is the mostversatileconcreterepairpump manufactured by Putzmeister. It's ideal for wet-process shotcrete in Civilapplications.TheMagnumhasa powerful46hp(34kW)Deutzdiesel engineandconveyslowslumpconcrete and packaged high-performance materials over long distances.

- 5 ft³ (142L) mixer capacity
- Powerful 46 hp (34kW) Deutz diesel engine
- Can handle up to ½ in (13mm) aggregate

Options include

- Mountedchemicaldosingpump
- Output pressure adjustment for grouting
- Radio remote
- Forklift skid frame mounting

** Mixer capacity is based on an average low cement refractory castable density of 165 lb/ft³.

MRV-2200 Shear Force — Pan Mixer

MRV-2200 Shear Force Pan Mixer | Wet Process

Putzmeister has engineered the MRV-2200 Shear Force pan mixer to be high shear, high energy and extremely efficient. The MRV-2200 Shear Force is ideal for wet-process Refractory applications and is fieldprovento provide faster mixing times. The machine's mixer discharge componente as ily fits over the hopper of a trailer- or forklift-mounted pump. An electric motor directly drives a heavy-duty planetary gear reducer, which drives a carousel-type arrangement of six mixing paddles.

- Field-proven to provide faster mixing times
- Engineeredtobehigh-shear,highenergy and extremely efficient

MRV-2200 SHEAR FORCE SPECIFICATIONS

| Technical Information | |
|------------------------|-------------------------------|
| Process Type | Wet |
| Mixer Capacity* | 2,200 lbs (1mt) |
| Mixer Fill Height | 88" (2,235mm) |
| Hopper Outlet Diameter | 12" x 16" (305mm x 406mm) |
| Power | |
| Manufacturer's Model | TEFC Electric Motor 460v/60hz |
| Horsepower | 40 hp (30kW) |
| Mounting | |
| Style | 4 adjustable telescoping legs |
| Brakes | - |
| Dimensions | |
| Length | 103" (2,616mm) |
| Width | 91" (2,311mm) |
| Height | 88" (2,235mm) |
| Weight (approx) | 6,300 lbs (2,858kg) |

 Mixer capacity is based on an average low cement refractory castable density of 165 lb/ft³.

Genuine Putzmeister Parts

Notall parts are created equal. Putzmeister offerslonger lasting, better performing parts under increased we arconditions. Our in-stock inventory includes more than 20,000 parts totaling more than \$40 million dollars. This means greaters avings and less down time.

CustomerSupportandService

Putzmeister proudly offers a dedicated Customer Support Group to provide assistance, answerquestions, and helpyou order parts. Count on 24/7 support from Putzmeister's highly trained technical support team to keep your equipment operating smoothly.

Parts Orders, Services & Customer Support 7 am – 7 pm CST (800) 890-0269
